Delivering Decision Critical Data™

Position Title: Senior Java Developer/Architect/Technical Lead – Application Frameworks

Company Overview

Ironhawk Technologies' (www.ironhawk.com) mission is to Deliver Decision Critical Data™ throughout the last tactical mile to the *tip of the sword* over narrow band satellite communication networks. Our advanced Java-based digital data management solutions are sold not only to the government, but also to intelligence-based and commercial organizations.

In this environment, we enable distributed and mobile organizations to share, synchronize and retrieve information across multiple platforms, databases, and networks. We accomplish these objectives by creating technology platforms, applications and services that improve the performance of our military communications and save lives in the operating theater.

Position Responsibilities

Ironhawk has an immediate need for a seasoned technologist with a passion for driving software architectures from the ground up, including developing applications-enabling frameworks, services-stacks, and high-profile APIs. The successful candidate will be able to independently synthesize stable software requirements from vague or notional system use cases; to specify and develop one-of-a-kind systems and foundational baselines; and to apply his or her experience with distributed asynchronous business workflow and high-performance synchronization techniques. This individual will also have significant experience with SOA and ESB concepts and practices and with integrating best-of-breed, open source components. S/he will have extensive and recent hands-on development experience with Java/J2EE and employ proven software development methodologies to work closely with other developers, product managers, QA, and clients/partners. S/he will be closely involved throughout all stages of software development and will have a track record of successfully delivering against aggressive timelines.

Position Requirements

- 10 years' total software development and integration experience, with at least 5 of them recently with Java.
- Solid working knowledge of Java EE, including servlets, JMS, JDBC, transactions and at least one compatible application server; of Java 5+ concurrency libraries; and of NIO.
- Solid working knowledge of Web Services: SOAP, XML, WSDL, and schema/XSD.
- Experience with SQL and at least one Java persistence framework.
- Experience working closely with customers in the process of formal requirements gathering.
- Strong verbal and written communication skills.
- Bachelor's in Computer Science, Software Engineering, or other science-related discipline.

**Employment Opportunity:
Senior Java Developer/Architect/Technical Lead – Application Frameworks**

Delivering Decision Critical Data™

Strongly preferred, but not required

- Master's or Ph.D. in Computer Science or a science-related discipline.
- Experience with distributed scalable database technologies and data synchronization.
- Experience with embedded real-time software development.
- Linux/UNIX power user.
- Experience with formal process-based software development methodology and process artifacts (e.g., RUP, UML, class diagrams)
- US Citizenship.

Equal Opportunity

Ironhawk is an Equal Opportunity Employer. Our hiring and employment decisions are based solely on your individual merit and your qualifications directly related to professional competence. Ironhawk does not discriminate on the basis of race, color, religion, national origin, ancestry, pregnancy status, sex, age, marital status, disability, medical condition, sexual orientation, gender identity, or any other characteristics protected by applicable Federal and/or state law.

Ironhawk will also make all reasonable accommodations to meet its obligations under the Americans with Disabilities Act (ADA) and state disability laws.

How To Apply

Ironhawk offers a competitive compensation package, including comprehensive benefits (health, 401K, stock options and profit sharing). To be considered for this position, you must meet the minimum requirements as described above and forward your cover letter and resume online to jobs@ironhawk.com. Agencies: please note that Ironhawk is not responsible for any fees for unsolicited resumes.
